Relay With MPLAB Xpress Evaluation Board

Author: Siva A

Version: 1.0

Introduction:

MPLAB Xpress IDE cost free development platform. It's cloud Based IDE available from microchip supporting PIC-based microcontrollers. The platform is comprised of code editor, build automation tools, debugger, code configurator. MPLAB Xpress IDE is an end-to-end solution enabling engineers to develop their applications from initial evaluation to final production.

Components Requirement

- Hardware
 - MPLAB Xpress Evaluation Tool.
 - Relay
 - Jumper wires
 - BC547, 1N4001 Diode
 - Power supply Breakout
- Software
 - MPLAB Xpress IDE

The logo for TENET TECHNETRONICS features a large, stylized number '35' in the background. The '3' is light blue and the '5' is pink. Below the '35' is the word 'TENET' in a light blue, sans-serif font. Below 'TENET' is the word 'TECHNETRONICS' in a larger, light blue, sans-serif font.

TECHNETRONICS

Step 1: Open your Browser and go to following link
<https://mplabxpress.microchip.com/mplabcloud/ide>

Figure 1 MPLAB Xpress IDE main window

Step 2: start creating our new project. Go to **File >> New Project**. Select **microchip embedded** as well as **standalone project** then click **next**

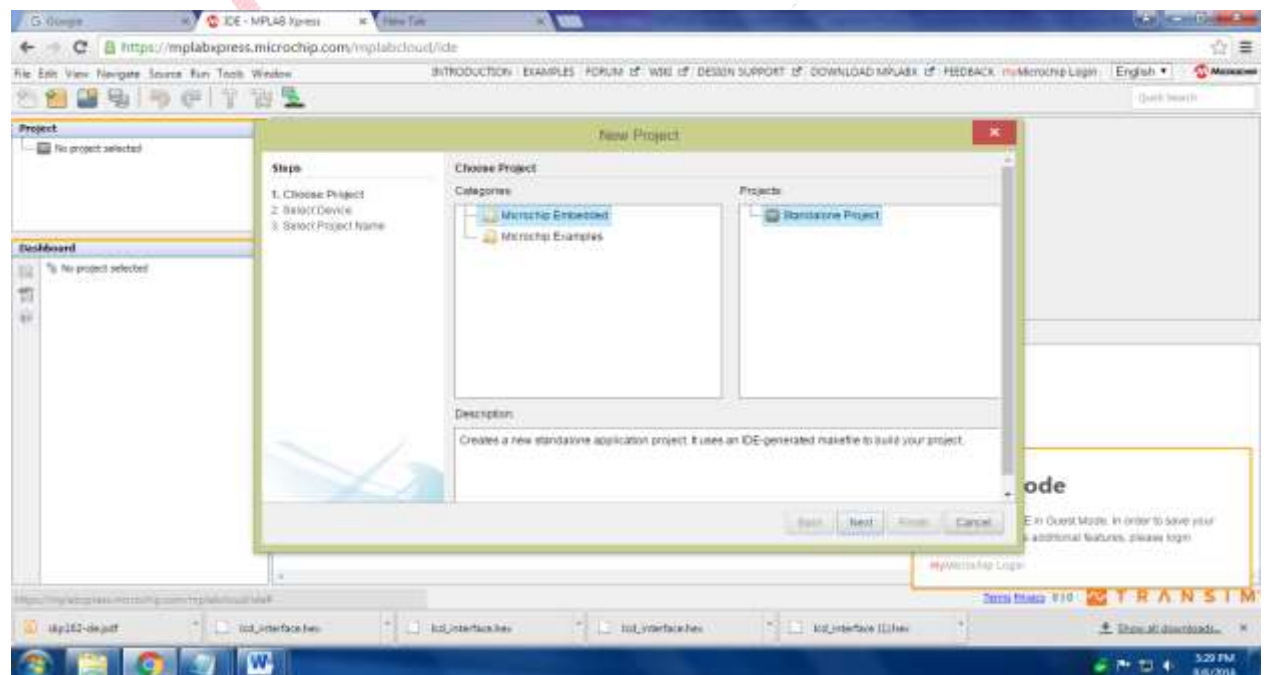

Figure 2 Open new project

9/3, 2nd floor, SreeLakshmi Complex, opp, to Vivekananda Park, Girinagar, Bangalore - 560085,
Email: info@tenettech.com, Phone: 080 - 26722726

Step 3: Select device **PIC16F18855**, and click **next** .

Figure 3 select Device

Step 4: Then give project name and click finish.

Figure 4 give project name

Step 5: Now choose MPLAB Xpress code configurator if its not present in your Device please Download and install from following link. <http://www.microchip.com/mplab/mplab-code-configurator>

Figure 5 Select mplab xpress code configurator

Step 6: Now we can see our MPLAB Xpress configuration window and select system module in MPLAB Xpress configuration window .

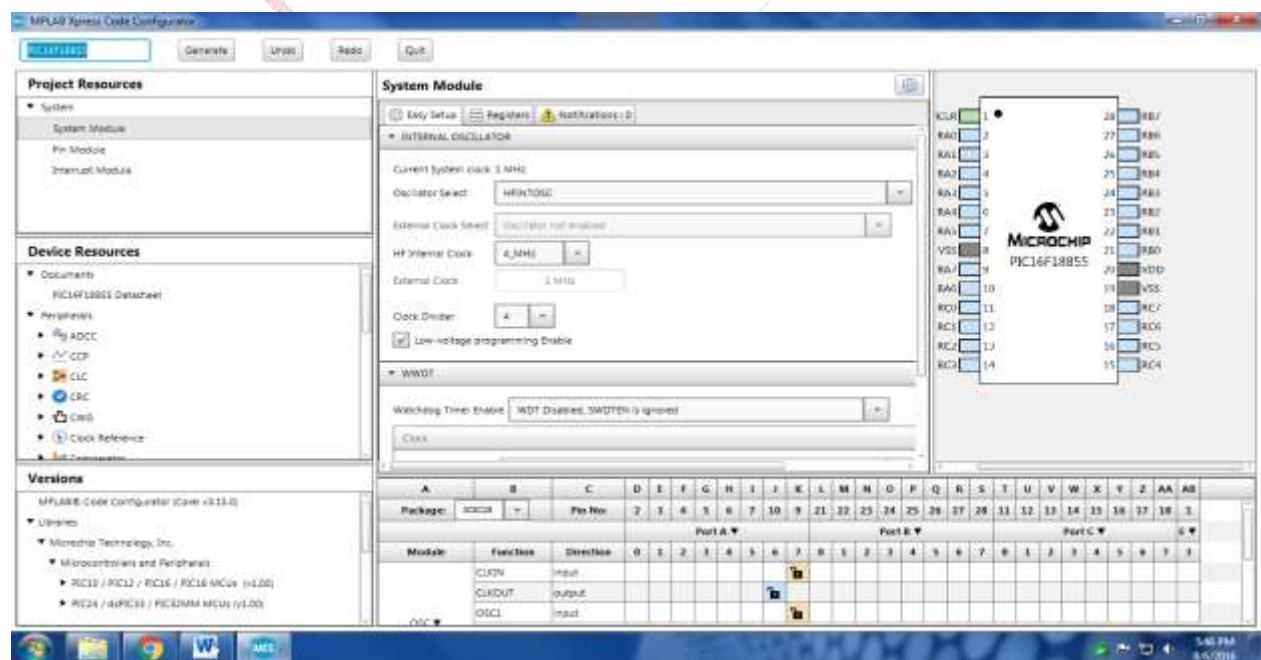

Figure 6 Assign project name

Step 7: Make oscillator configuration and select required pin .

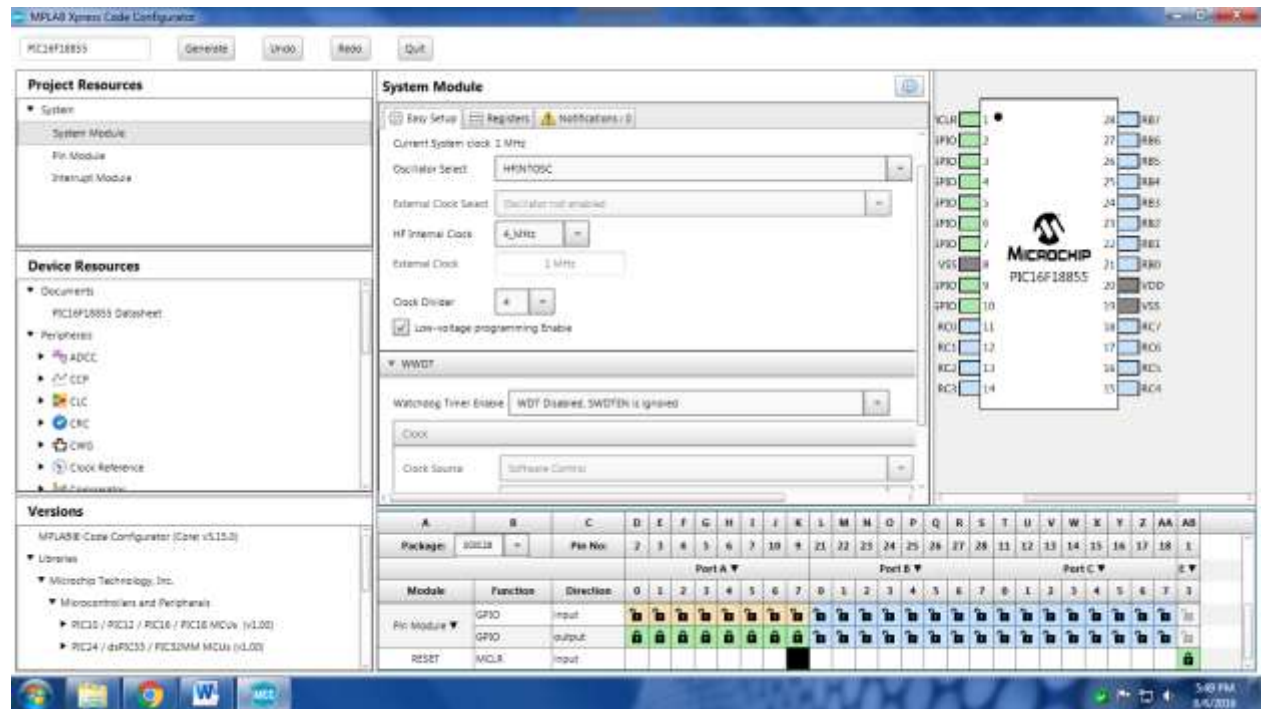

Figure 7 select pin

Step 8: select pin module in MPLAB Xpress configuration window. Which pin you want you can choose here And select peripherals timer, PWM. Finally click Generate Window.

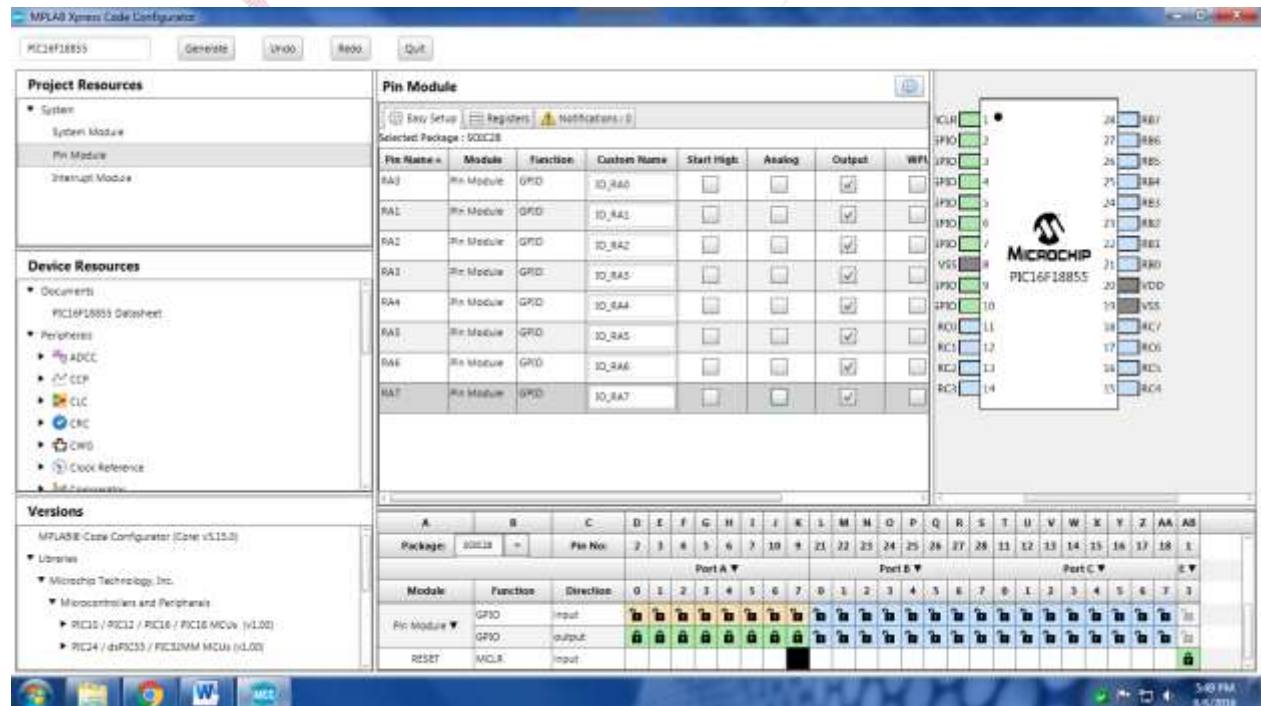

Figure 8 pin configuration set

SOURCE CODE:

```
#include "mcc_generated_files/mcc.h"

void main(void)
{
    // initialize the device
    SYSTEM_Initialize();
    RA0=1;
    while (1)
    {
        RA0=0;
        __delay_ms(10000);
        RA0=1;
        __delay_ms(10000);
    }
}/**
End of File
*/
```

TENET
TECHNETRONICS

Step 10: Go to your MPLAB xpress IDE Erase all existing code and copy above code past there and add header file from given file then make clean and build for Export . if you done this go to download you can see hex file for your project.

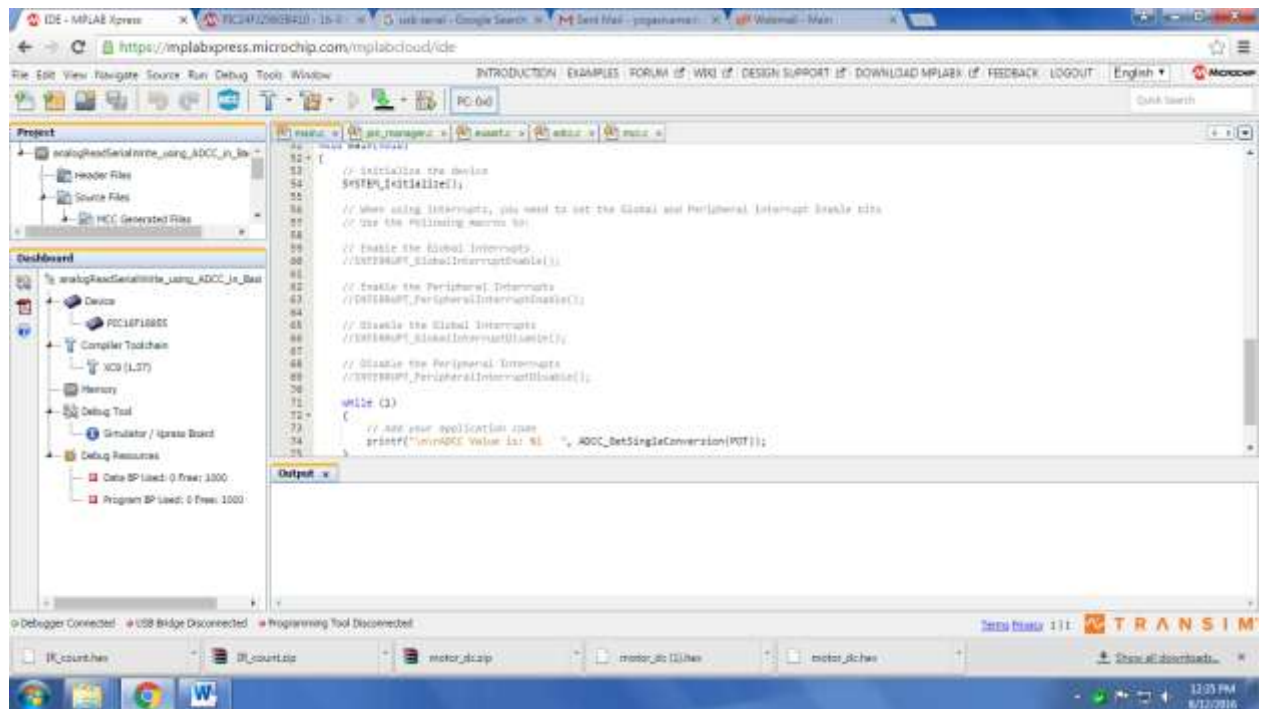

Figure 9 Build the project

TENET
TECHNETRONICS

Step 11: Now, if all goes well connect the Micro B cable to pic16f18855 (mplab xpress demonstration board) and connect it to your computer. If you done you can see your devise. And copy that Hex file to your device. And make hardware connection.
