## Introduction

A Single Pole Double Throw (SPDT) switch is a switch that only has a single input and can connect to and switch between 2 outputs. This means it has one input terminal and two output terminals.

Tenet's SPDT v1 breakout is a single slide switch breakout with which we can switch/control a supply voltage to the circuit. SPDT switch is used to switch ON/OFF the supply voltage to the circuit. SPDT SW1 switches the supply voltage (VCC) between O/P1 and O/P2.

## Applications

- Power supplies
- Home appliances
- Consumer electronics
- Toys
